

Stuttgart
14-17/05/2024

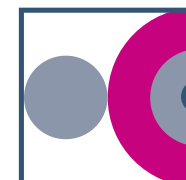

Deepens insight into international
grinding, boosts
growth by advances in technology.

The GrindingHub premiere in Stuttgart has convinced the sector:
a resounding success from the outset – with clear skies ahead.

An international hub for grinding technology and superfinishing, this new trade fair met with a resounding response from all sides. It is now time for the next stage: GrindingHub 2024 will be continuing its consistent alignment to the sector in the form of an innovation forum. By focusing on all aspects along the value chain, **GrindingHub 2024** will be presenting for the second time the future potential of the sector and the associated relevance to the market.

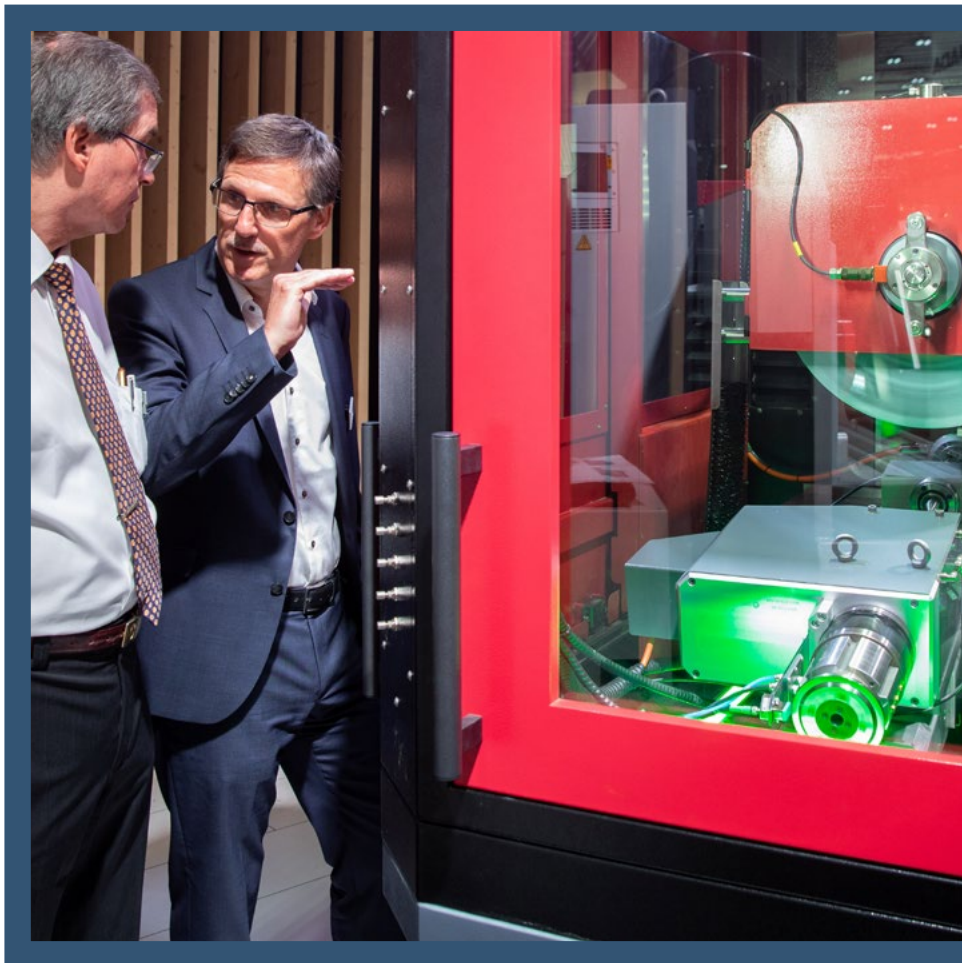

360°, clean cut,
in-depth facts:
GrindingHub
2022.

Center stage is taken by the whole bandwidth of grinding machines and abrasives. In addition, GrindingHub 2024 provides a comprehensive view of the production environment surrounding grinding technology: IT and software tools, the whole range of process peripherals, the required measuring and testing systems, all QM processes, and new solutions for greater sustainability and energy efficiency. The sector has long seen itself as a significant constituent of technological solutions, also with respect to new challenges:

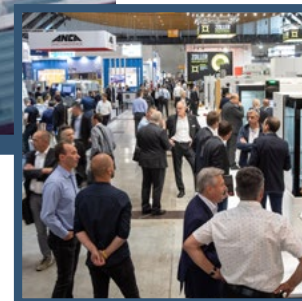

ecologically sustainable, technologically innovative, and internationally competitive.

Prepared
extensively for
a dynamically
evolving industrial
environment.

The concept and the success of the GrindingHub premiere found confirmation in many encouraging statements from exhibitors, visitors, trade journalists, the trade public, and associations. GrindingHub 2024 will again be hosted by the German Machine Tool Builders' Association VDW from Frankfurt am Main, in well-established cooperation with Messe Stuttgart and, as conceptual sponsor, the "Machine Tools" industry sector of Swissmem, the Swiss association of mechanical and electrical engineering and metalworking industries.

Encouraging
responses
underscore
GrindingHub's
relevance to
the market.

Highly promising auspices, therefore, favoring the trade fair event for the grinding and superfinishing sector in 2024! Here, grinding technology will continue to wield its significance and weight as a reliable partner of hi-tech solutions and to promote the course of growth. At GrindingHub, the user sectors of grinding technology can identify and incorporate innovative potential at an early stage.

So secure in good time your participation as an exhibitor at GrindingHub 2024, at the industrial magnet Messe Stuttgart!

The expertise
represented
at GrindingHub.

Participation and prices 2024
